

Modular Design System

<http://emberisl.github.io/mds/>

Introduction

The Modular Design System is a collection of web modules created for various content & design strategies. Each module comprises components that may be shared with other modules. Together they provide a consistent, unified and adaptive visual presentation. With easy prototyping and customization, the system offers an efficient approach to common design tasks.

Group Preview

The module system essentially is a way to recycle, repurpose, reinvent. Having all the modules documented in one place means their mission wouldn't end with a particular project. Instead the ideas and strategies will continue to exist in future projects and inspire more solutions. In theory, it may be an efficient approach to problem solving and scaling up operations.

CT_2 • Content 3-Col

If you have to pick a movie out of Gravity(2014), Interstellar(2015) and The Martian(2016), which one would you pic and why?

I Would pick Interstellar out of the three for its depth and emotional impact. The movie by Christopher Nolan touches on a collection of issues we have for the future: our environment and survival. Not just human versus nature, but also how we resolve the clashes of our beliefs and values. Our desire to continue to survive, explore and advance plays a big role in the movie. Characters' sacrifices and weaknesses as individual beings are all closely tied as the story develops.

What is your favorite character in the 2015 space sci-fi movie Interstellar?

I'd pick Murphy played by Jessica Chastain. She's the daughter of a pilot in Interstellar. And she becomes the captain of a spaceship in The Martians.

What type of other movies do you usually watch?

Mostly I watch drama genres. I don't watch Sci-fi movies as often. Travel, biography and documentary movies are also my favorites. Terror and thrillers are the movies I generally avoid. Also I love watching anything that involve LGBT topics. If a movie that's either 50% on Rottentomatos or 6/10 on IMDB, it will show up on my list!

What about TV shows? What are some of the shows you finished and wanting to finish?

My taste for TV shows are consistent with the movies. I finished 8 seasons of The Good Wife and 6 seasons of Madam Secretary. I like stories of bad bitches who shatter barriers and do interesting things. I watches quite a bit space & astronomy series - they made me think about the purpose and significance of our lives.

Module Details

Individual modules with their responsive views

Desktop

Larger than 1280px

Tablet

1279px – 768px

Phone

smaller than 460px

Print

Letter size

Visual appearance:

Structure:

The headers and layout composition help establish the hierarchy. Let the logical and meaningful structure guide viewers through the content.

Minimal styling:

A clean wireframe feel allows for complete focus on concept & strategy without visual distractions. Visual customization comes later in the design process.

Versatile:

It's easy to mix & match, repurpose and reinvent based on the needs. Everything can be customized to suit the project's content and strategy.

Unified look:

Balanced formatting & consistent appearance across all modules and components. Universal styles and CSS get put to work.

Responsive layout:

Modules are optimized for multiple viewport sizes to deliver best experience on desktop, tablet, mobile devices. Visual mockups are available for 3 viewport breakpoints.

Function:

The collection covers a wide range of components for common design tasks. Each module designed with clear purposes and usages in mind.

If you have to pick a movie out of Gravity(2014), Interstellar(2015) and The Martian(2016), which one would you pic and why?

I Would pick Interstellar out of the three for its depth and emotional impact. The movie by Christopher Nolan touches on a collection of issues we have for the future: our environment and survival. Not just human versus nature, but also how we resolve the clashes of our beliefs and values. Our desire to continue to survive, explore and advance plays a big role in the movie. Characters' sacrifices and weaknesses as individual beings are all closely tied as the story develops.

What is your favorite character in the 2015 space sci-fi movie Interstellar?

I'd pick Murphy played by Jessica Chastain. She's the daughter of a pilot in Interstellar. And she becomes the captain of a spaceship in The Martians.

What type of other movies do you usually watch?

Mostly I watch drama genres. I don't watch Sci-fi movies as often. Travel, biography and documentary movies are also my favorites. Terror and thrillers are the movies I generally avoid. Also I love watching anything that involve LGBT topics. If a movie that's either 50% on Rottentomatos or 6/10 on IMDB, it will show up on my list!

What about TV shows? What are some of the shows you finished and wanting to finish?

My taste for TV shows are consistent with the movies. I finished 8 seasons of The Good Wife and 6 seasons of Madam Secretary. I like stories of bad bitches who shatter barriers and do interesting things. I watches quite a bit space & astronomy series - they made me think about the purpose and significance of our lives.

CD_3 • Card Carousel 4-Col

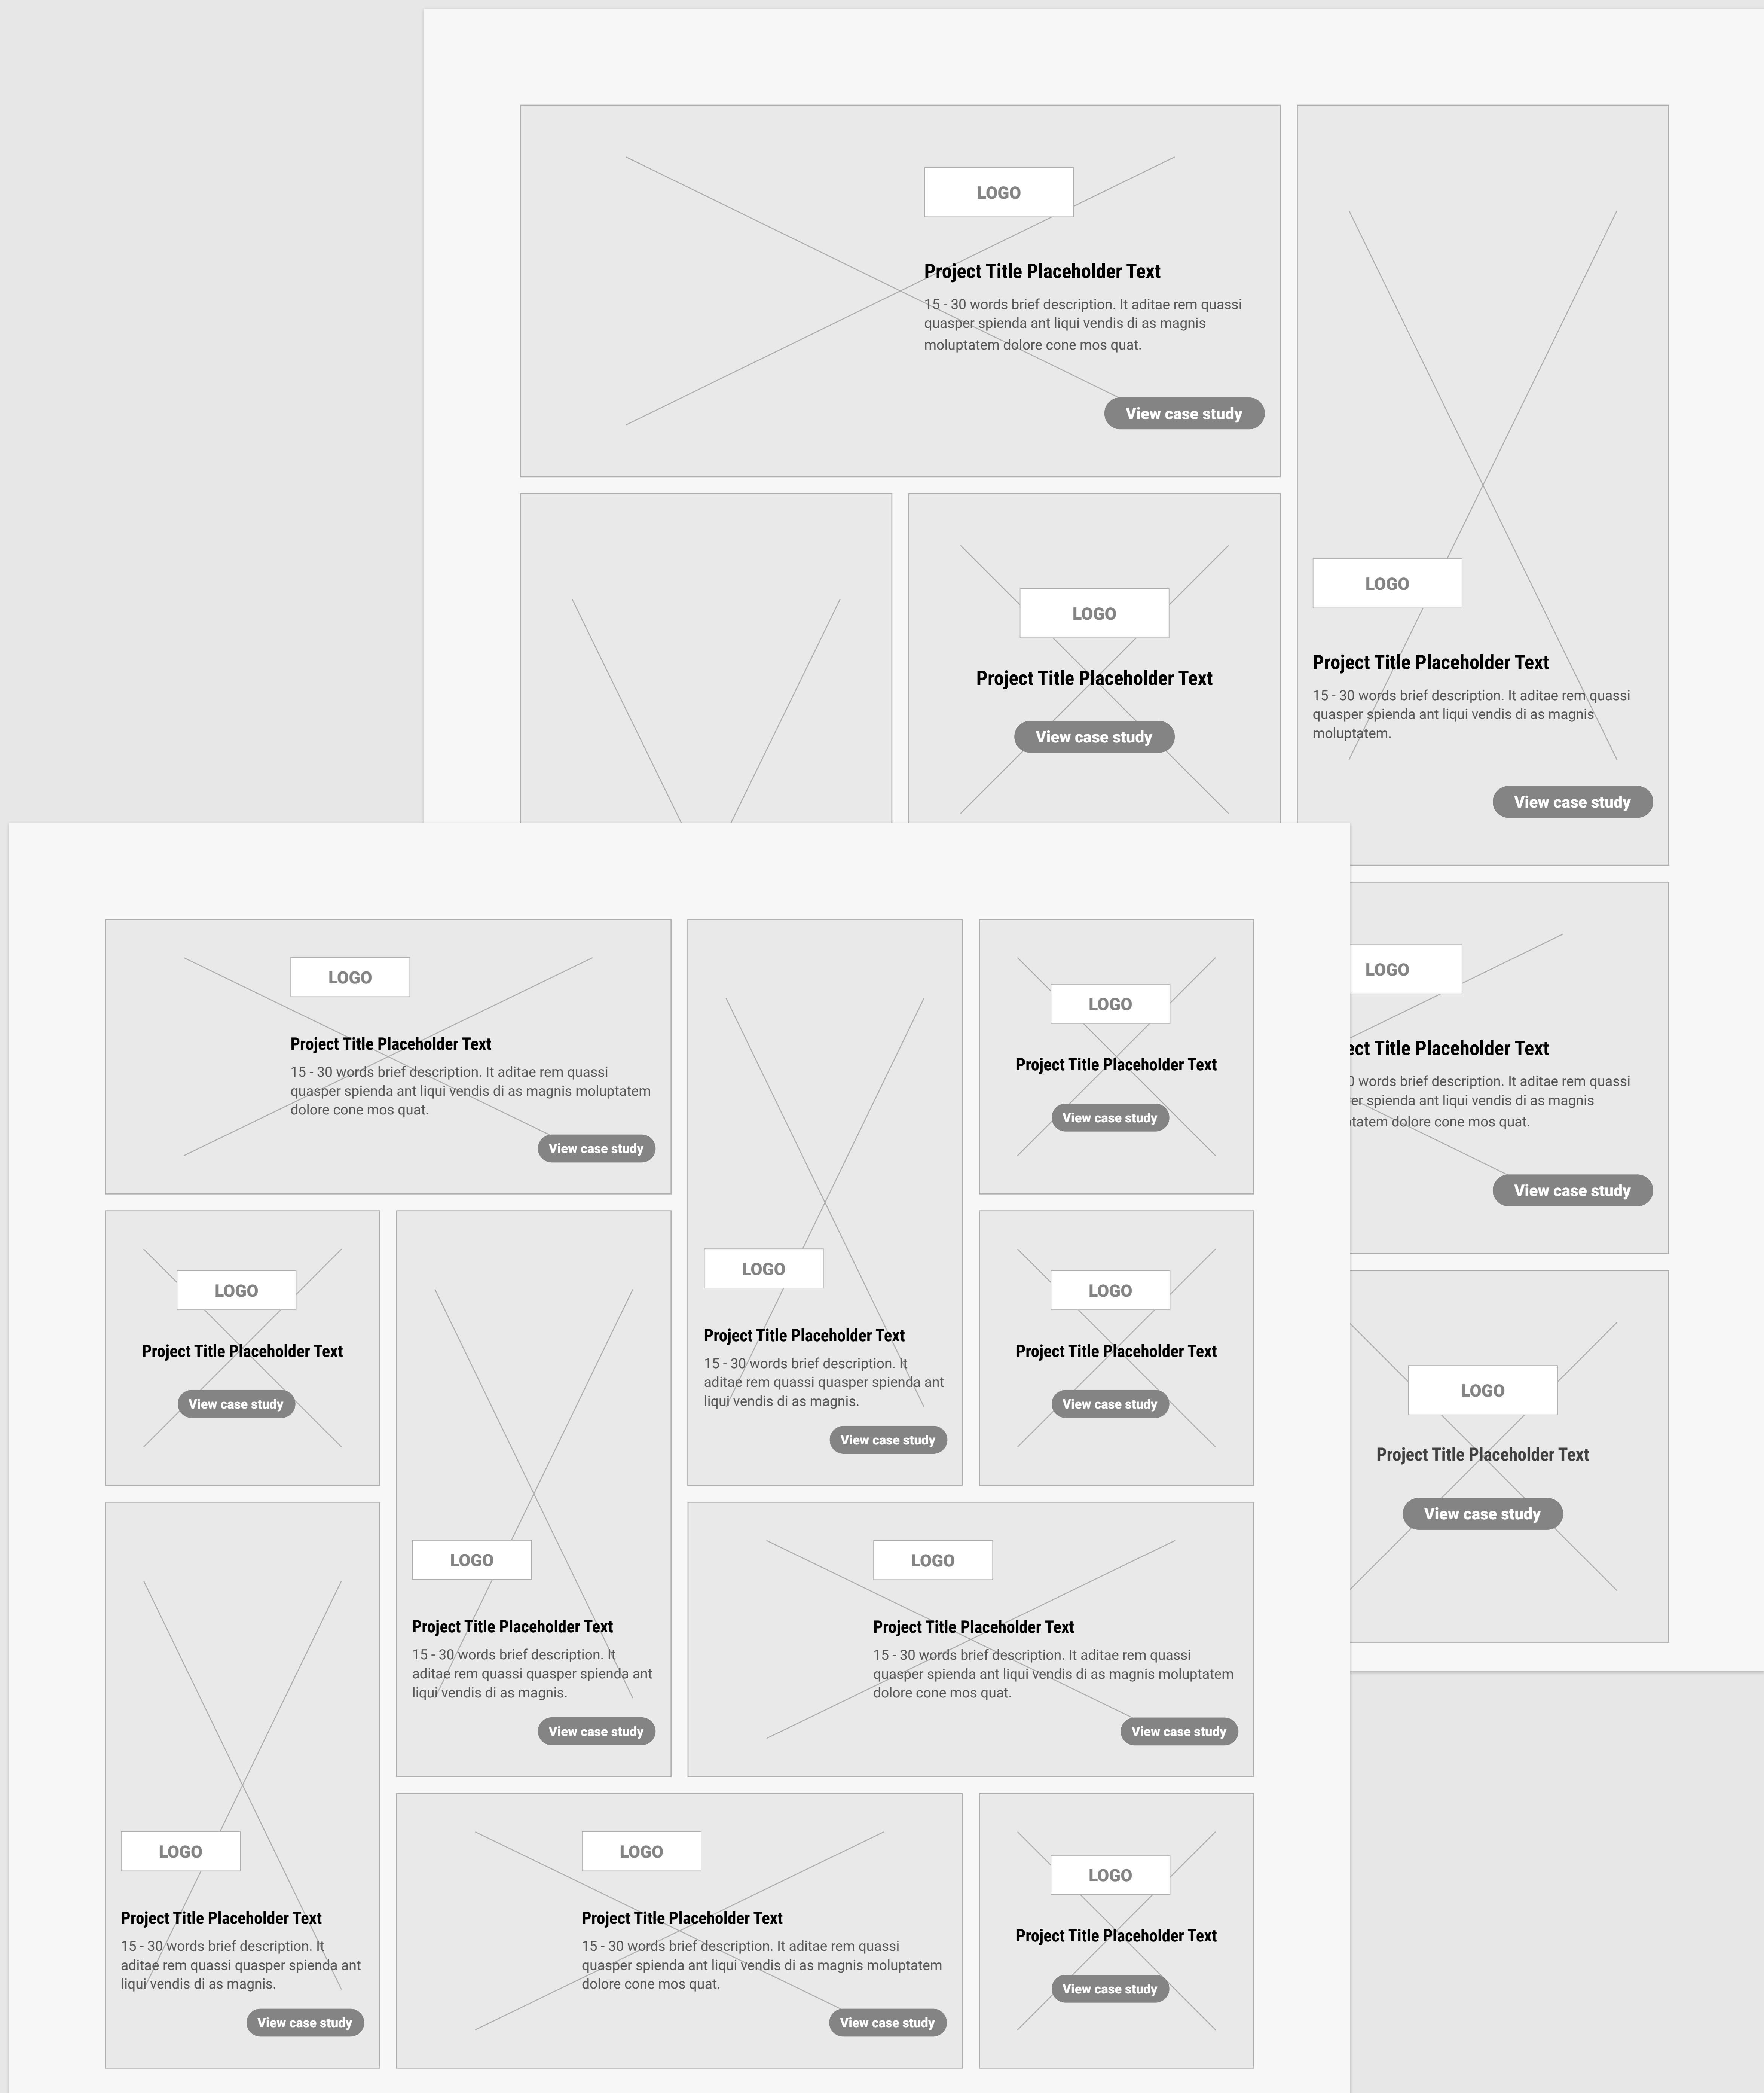

CD_3 • Card Carousel 4-Col

The wireframe shows a horizontal scroll bar at the bottom of a container holding four cards. Each card has a gray header section labeled 'Category' with a large 'X'. Below this is a white section labeled 'DECK PLACEHOLDER' containing an 'H3 title placeholder Center'. The text is a placeholder Latin paragraph. At the bottom of each card is a dark button labeled 'Call To Action' and social sharing icons for 'Like', 'Share', and 'Email'.

CD_3 • Card Carousel 4-Col

This wireframe illustrates a card carousel where the fourth card is taller than the others. It follows the same structure as the first one, with a gray 'Category' header, a 'DECK PLACEHOLDER' section with an 'H3 title placeholder Center', and a 'Call To Action' button. The fourth card's content is truncated on the right side due to its height.
